

FENCING RANGE

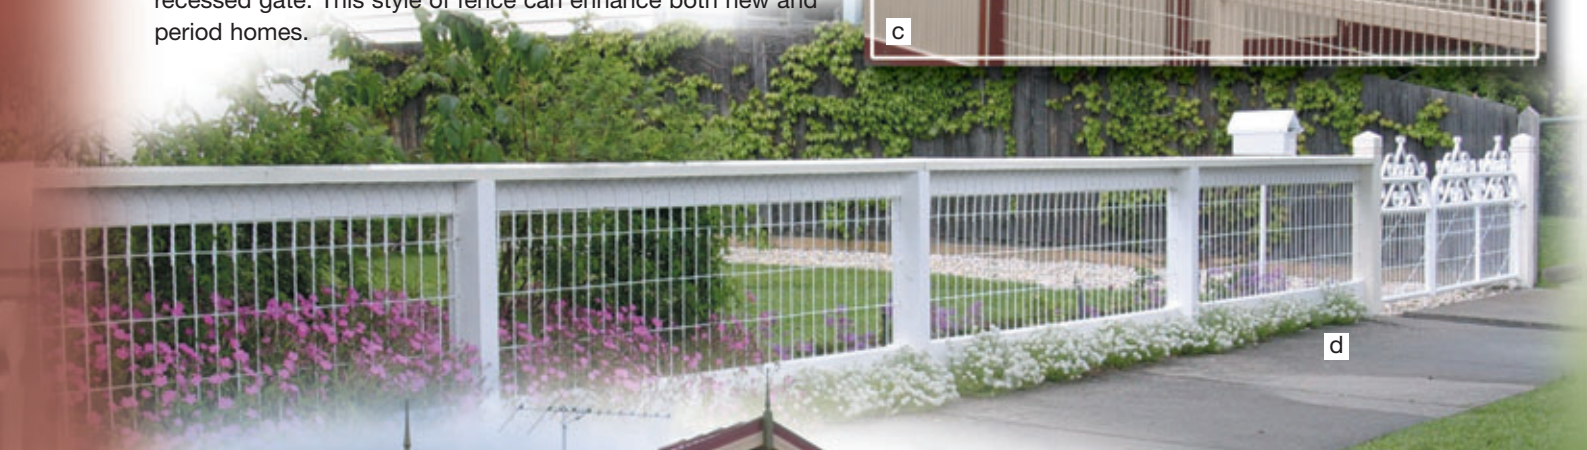

Quality is Everything

Feature Fences

For a range of high quality fences, expert installation and helpful service, look to Macedon Fencing and Citywide Temporary Fences. Our range includes fences for homes and industrial and commercial applications. Citywide offers the hire of fences and crowd barriers where they are required for security or by law. As a member of the Master Builders Association and Australian Chain Link Fencing Association, you can be assured of our integrity as professional fence builders. For a free no-obligation quote, discuss your fencing requirements with one of our friendly staff today.

- a. This combination includes a satin black rod top and brush fence panels between rendered brick pillars. The horizontal slat jarrah fence set back creates a real feature.
- b. Brush fencing is a great style for blending in with most landscapes.
- c. Traditional timber picket with colonial capping and cast iron capitols.
- d. Traditional capped woven wire fence shows off your garden and creates the illusion of more space.
- e. Traditional capped woven wire fence with windsor capitols and recessed gate. This style of fence can enhance both new and period homes.

QUALITY IS

Timber Pickets

The beauty of a picket fence is sure to be an attractive addition to your landscape.

f. Standard period picket fence with a three picket rise to feature posts.
This also has a recessed gate which enhances the entrance.

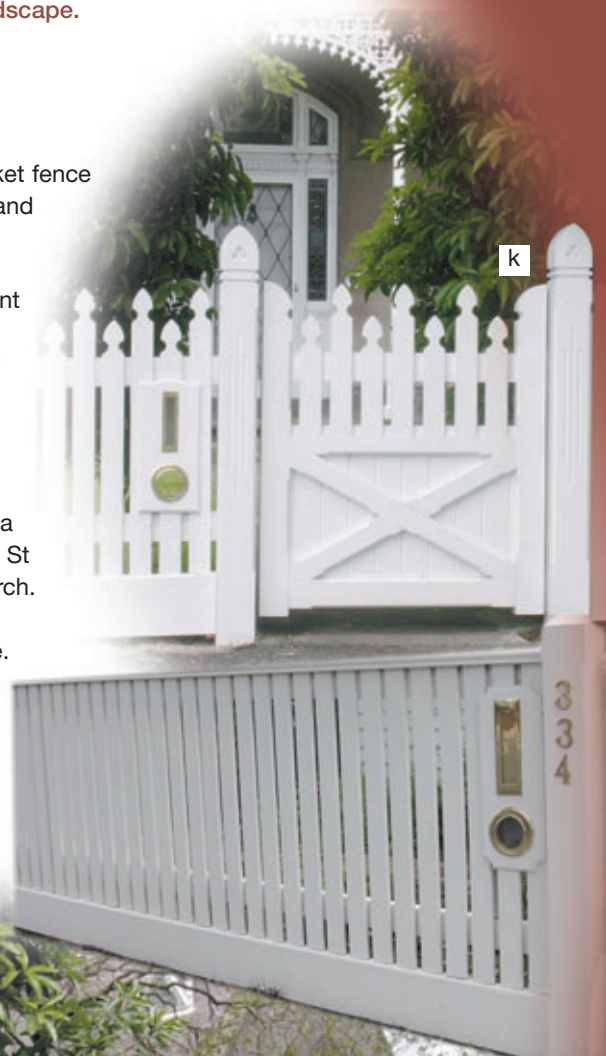

g. Traditional scallop picket fence with windsor capitols and pickets.

h,i,j. These are three different styles of federation picket fences with and without the feature pickets.

k,l. This beautiful feature picket fence is a replica of the original fence at St Thomas Anglican Church. Featuring a traditional mortise and teron gate.

Timber Fences

- a. Capped treated pine paling fence with 125 x 125mm exposed express posts.
- b. Treated pine paling with exposed 125 x 125mm red gum posts with 1300mm high boxed lattice.
- c,d. This feature fence is made of 90 x 20mm treated pine decking with hidden posts and capping with an intergrain finish. This fence was constructed at the new Spring Thorpe Estate.
- e. Standard capped treated pine paling.
- f. Horizontal slat gate.
- g. Hardwood paling fence with extended posts and three rows of barbed wire.

Colorbond® Fences

At Macedon Fencing and Supplies, we're proud to offer the Gramline Colorbond range of fences.

These fences promise outstanding durability, excellent security, and are finished in a large range of colours to suit both contemporary and traditional settings.

The sawtooth profile of Gramline Colorbond fencing is the same on both sides, so there is no "front" or "back".

The Gramline lattice also offers you the option of customising your fence due to its structural strength.

Tabular Fencing

Temporary Fencing

Temporary chainmesh fencing & crowd barrier hire.

Secure your asset, property, construction site, festival, event, concert, roadworks, compound, exhibition, venue etc . . .

For us, fencing must accomplish two goals, it must provide security and it must look appealing. Temporary fencing can make a statement about the construction project or a special event at a first glance. To provide proper security it must not only look strong, it must also be strong.

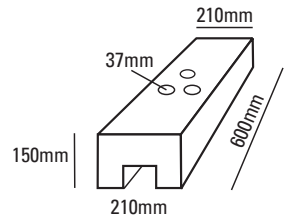

All our installers are registered CFMEU, C - Bus, INCOLINK, COINVEST etc.

Chainlink

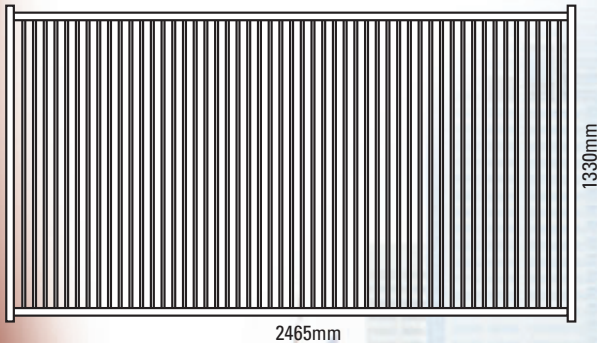

All our fences are constructed from individual premounted panels of high quality chain link, stretched to perfect tension on full frames of galvanised tubing.

At the job site all panels are joined either at angles or in a straight line to form a solid fence wall. The option of barbed wire gives you extra security. Our posts can be driven into the ground or made free standing on concrete blocks. All of our fences include stabilise poles to secure strong and sturdy fences on long runs and wind prone areas.

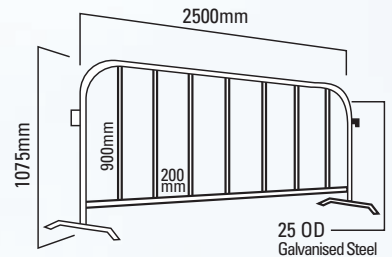

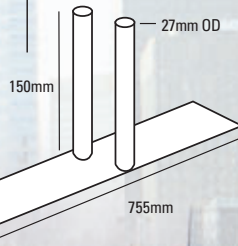

Crowd Barriers

2.5 metre lengths are joined together with an eye connection and a locking hook. This together with heavy gauge tubular feet makes it almost impossible to violate the barriers, integrity until removal is required.

Temporary Pool Panels

Citywide temporary pool panels secure your pool whilst under construction.

It's Now Law!

Citywide Temporary Fencing is Melbourne's leading temporary fencing name. If you need to protect property or assets, conform to site regulations or maintain effective crowd containment, we can provide a competitive hire solution. There is a range of options to suit the security and portability required, and no job is too big or too small.

Citywide Temporary Fencing proudly supports the new building and works code of practice adopted by many councils. Security temporary fencing is now compulsory during any building and construction works.

Citywide Temporary Fences is proudly associated with the Australian Grand Prix.

The Team at Citywide are on hand to assist any customers requiring temporary fencing for residential and commercial construction sites.
